Frameworks:	React.js, React.ts
Libraries:	Material-UI, Bootstrap, Redux, Axios
Developer Tools:	VS Code, Git, Github, Insomnia, Linux
Other Skills:	Android Development, Adobe Photoshop

PROJECTS

Employee Management system *React.js, Material-UI*

<https://github.com/NihalP01/employee-management>

Developed a comprehensive Employee Management System that empowers administrators to efficiently track attendance, manage payroll, and record payment details for employees. The system offers a user-friendly interface that simplifies daily attendance management and provides a consolidated overview of employees' attendance records, including total present and absent days. Additionally, the system calculates payable amounts based on attendance and facilitates the recording of payment disbursements to employees.

Online Currency Converter *Java, Swing UI*

<https://github.com/NihalP01/Currency-Converter>

Online currency converter that seamlessly retrieves up-to-the-minute currency exchange rates through API integration. This converter not only efficiently converts amounts between chosen currencies but also delivers real-time updates on precious metal prices such as gold, platinum, and silver.
